

## ENVIRONMENTAL POLICY

### Pininfarina S.p.A.

For Pininfarina S.p.A., the environment and the working areas are a system to be carefully preserved: therefore, every equipment, production and non production process as well as service, is aimed at the creation of a non significant impact to the environment and to guarantee the protection of the Workers' health and safety.

The *Sistema di Gestione Ambientale* (S.G.A.) (Environment Control System) used by the Company is aimed at continuously improving its performances vis-à-vis the environment so as to implement the Quality System in force in conformity to standard ISO TS 16949.

With reference to the above mentioned, Pininfarina S.p.A's acknowledgments are:

- S.G.A.'s aims are as important as those of productivity and profitability: thus the responsibility of their achievement belongs to the whole organization structure;
- being in conformity to the laws in force and to any other document undersigned by the Company is considered as imperative as well as a minimum requirement;
- all actions must be effectively made to prevent pollution and to protect the Workers' health and safety;

- products, processes, services as well as activities reducing, as much as possible, the impact on the environment, preventing environmental accidents and work risks must be continuously improved;
- the consumption of energy as well as natural resources must be rationalized as much as possible;
- all production sites must adopt medium and long term programmes necessary to protect the Workers' safety and the environment: these latter will be updated following technological development, new discoveries and past experiences;
- both environmental policy and S.G.A. must be continuously checked and revised in any part so as to achieve objectives and goals;
- a document system including emergency procedures must be developed, kept and checked
- Pininfarina's personnel and those cooperating with them, must increase its professionalism and care towards the environment, thanks to information and training;
- suppliers and contractors must be informed about the environment policy in force, promoting a tight collaboration, cooperation and coordination so as to achieve the best results as per environment performances and protection of the Worker's health and safety;
- Pininfarina must keep and promote positive communication connections with Local Municipalities and with the Authorities of all Departments.

June 2008
